using an external text editor. File: Origin

Using an available serial number and a group license, add the user to the FLEXnet. Download the license file that you want to use. Install the license file with the FLEXnet installer. When installing the Origin software, choose the location for the license file. For installation options, see Microsoft's Help for the Origin software. If you have more than one user license, you must create a separate license file for each user. If you receive any error messages while installing the license file, consult the add/remove programs control panel. Setting up a license key. Open Windows Explorer to the folder containing your Origin application, called . Right-click the Origin icon. Choose Properties. On the General tab, change the Location to a new one. On the Location tab, select the Use the following location option, and then browse to the location where you want to store the license file. The path you provide is the location where the FLEXnet administrator can store the license file, but it is not the location where you want to store the file. Right-click the Origin icon again, and then choose Manage Application Settings. Add the user to the FLEXnet. To add a user: 1) Start the FLEXnet Administrator. 2) In the License Services window, choose User Management and select Add. 3) In the Add Users window, select the user. 4) Click OK. The Origin application uses FLEXnet to manage license keys. The FLEXnet application is available in standard editions of Windows Vista, Windows 7, Windows 8 and Windows 8.1. The FLEXnet license file is a text document. To install the FLEXnet license file, follow these steps: 1) Start FLEXnet. 2) In the License Services window, choose Copy. 3) The copy appears on your desktop. To copy the license file to an existing location, choose Save and specify the new location. A text document is the only type that can be saved on the desktop or in a folder. On the Licenses tab, in the . Right-click the Origin icon again, and then choose Manage Application Settings. On the General tab, change the Location to the location where you want to store the FLEXnet license file. The path you provide is the location

where the FLEXnet administrator can store the license file, but it is not the e24f408de9
