jDSP is a Java library which aims to provide common digital signal processing (DSP) algorithms in a Java environment. It provides a number of classes for signal processing and manipulation, filtering, Fourier transform, etc. To be more specific, this library includes a number of classes that can be used for DSP-related problems in multimedia.

Features: jDSP is designed to be platform-independent and portable. It can be used on any platform (Windows, Linux, Mac OS X, Java ME, etc.) which supports the Java SE platform.

Supporting Files: The jDSP project includes a package archive, and three binary packages: jDSP, jDSP_Debug, and jDSP_Linux (for Linux-based

platforms only). Are European Union (EU) countries ready to use genetic testing to eliminate the disability of an individual with a mitochondrial DNA (mtDNA) deletion mutation? The primary caretaker of a severely affected young girl living in Ireland, who has been diagnosed with a mitochondrial DNA (mtDNA) deletion, is raising awareness of the challenges she faces in accessing genetic testing and treatment. Dores Murphy, born in October 2010, has maternally inherited a point mutation of her mtDNA. As a result, she has a severe mitochondrial disease characterized by progressive degeneration of her central nervous system, progressive external ophthalmoplegia, and an inherited complex syndrome of disorders. Her mother, who has been advised to be

vigilant about birth defects, has had two miscarriages. [Read more: An Irish family is fighting to find a cure for mitochondrial disease] Dores Murphy has a severe mitochondrial disease with an inherited complex syndrome of disorders. Image: Courtesy Dores Murphy Dores is in the later stages of her disease and requires 24-hour care. Her mother is in the process of applying to the Social Security Agency (SSA) for Disability Living Allowance (DLA) and so is unable to work due to fatigue and the cost of her daughter's care. Due to the fact that Dores is the product of a spontaneous conception, her mother and father are unlikely to have had a pre-conception consultation or be aware of the implications of their pregnancy. Despite Dores' young age, her development is severely delayed

and, as a result, the family has encountered a number of obstacles when attempting to access the support that she needs. “I have attempted

SourceForge: Credits: jDSP is a product of Alex Lehmann. This work was based on the C-Implementation found on ITCMedia's homepage.

ITCMedia: The JDSplib.java file comes from ITCMedia. Only the jdsp.java file has been modified to incorporate the changes required to create jDSP version 2.0. The C version was translated into Java using "externalize" with the Java2C compiler.

ISLAMABAD: Pakistan Tehreek-i-Insaf (PTI) Chairman Imran Khan on Friday said that his party will release an

statement on corruption scandal of Rs1.5 trillion on Monday. “We have decided to release the statement on Monday. We will be releasing a statement tomorrow on party’s struggle against corruption. It is not only Imran Khan, all PTI leaders will be releasing statements in this regard,” he said while talking to media on the sidelines of a meeting at the Ministry of National Food Security and Agriculture here. He said the government, which spends billions of rupees every year on their own welfare, should spend some of the money on the welfare of others. “But the budget doesn’t have any provision for the people. The government spends billions of rupees every year on its own welfare. What about the rest of the country? The people suffer due to lack

of electricity, lack of schools, roads, hospitals. It's time we start spending on the welfare of others," he said. The PTI chairman, who is also the federal minister for petroleum, said that it was a new government and it would do the things differently. "I would like to ask the ministers of the previous government what they did with their tenure. They spent billions of rupees on their own welfare and did not spend anything on the welfare of others."

What's New in the JDSP?

jDSP is a small, easy to use, Java library that contains classes for digital signal processing. This library was mainly intended to be used in audio software development. jDSP contains a variety of useful signal processing and mixing algorithms, as well as data structures and tools for implementing low-level FIR filters, IIR filters and FFT. It supports various host OSes, including Linux, Windows, Mac OS X, FreeBSD, Solaris and *BSD. It is free software, available under the GNU Public License. On a scale of 1-10, I'd put this at an 8.5! This is a very light weight sock, but does it's job in my opinion. I bought this in men's size 7. I don't usually do this, because i can't wear any others due to a major injury. I

wore these for 6 hours straight, with no issues. I will say that if you are not buying a new pair of socks every couple of months, I would say this is something you could survive without. You can purchase these socks from many places on-line, such as amazon.com. You can purchase for under \$20!“I can’t believe that I actually won. It’s really great.”

Surprise! After round one of this year’s AMS playoffs, Los Angeles’ Brett Munroe somehow got past Madison’s Bronson Folsom. The match took about seven hours. In the end, Munroe took the win with a score of 5-1. “Last year, Bronson beat me and I beat him, so I was so happy,” said Munroe. “I wasn’t expecting this time to go as well as it did, though. I was working on Bronson.” This year, Munroe started as

the number one seed, but even after a tight set he was only able to take the win from last year's runner-up, Kyle Lawrence. This season, Munroe is ranked number two. Folsom said he's looking forward to next year. "I think he's a really nice player," Folsom said. "He's probably one of the better players." Despite his obvious improvement, Munroe said he felt his season was pretty good. "My favorite match this year was against Wes Eikerman. It was really fun. We beat him 5-2. That was my first win over Wes." This year's tournament went down at the American Memorial Stadium in Madison. Last year, the AMS moved the tournament to a larger venue, Madison Central High School. This year, the tournament was held in the gym. ♠
